## EXECUTIVE SUMMARY

The Johannesburg Social Housing Company SOC Limited (“JOSHCO”) was established in November 2003 by the City of Johannesburg (City). JOSHCO’s mandate is to provide and manage social and affordable rental housing for the lower income market as part of the City’s strategy to eradicate the housing backlog of the City. It is a registered Social Housing Institution and is accredited by the Social Housing Regulatory Authority (SHRA) of South Africa. JOSHCO predominantly serves families whose total household income is between R3500 and R15000 per month. The core business of JOSHCO includes: the development of social and rental housing; the refurbishment, upgrading and management of some of the City Council owned rental housing stock; the refurbishment, upgrading and management of hostels and the provision of turnaround strategies where necessary. As a Municipal Owned Entity (ME), it is required to comply with all the relevant legislation (i.e. Municipal Finance Management Act, Municipal Systems Act, SHRA Act and, the Companies Act). The policies and strategies of the organisation are strongly influenced by the vision of the City of Johannesburg which has found itself in the Growth and Development Strategy 2040 (GDS).

The company’s implementing philosophy is combining quality and quantity in an endeavor to develop social housing settlements that transform the lives of JOSHCO’s tenants.

JOSHCO’s Project Portfolio:

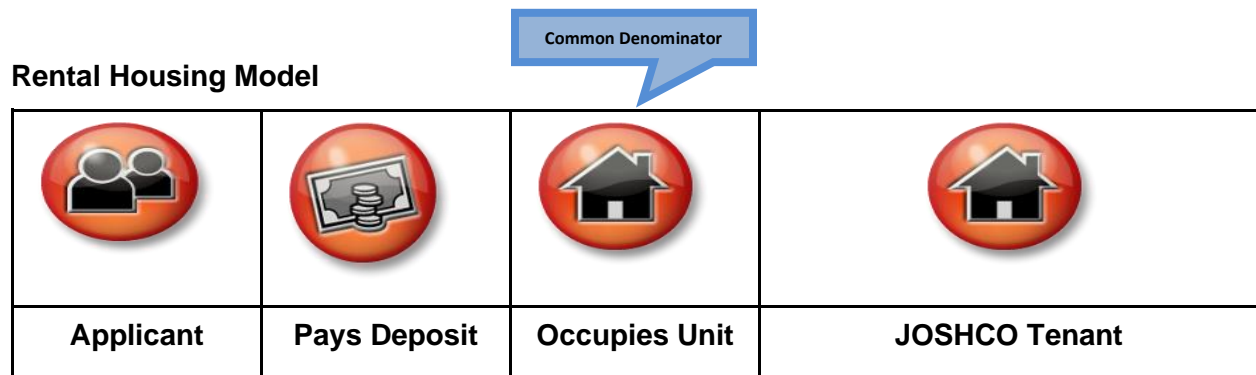

- Greenfield and Brownfield developments;
- Hostel redevelopment;
- Inner City refurbishments/conversions;
- CoJ public stock/upgrades and;
- Communal and transitional housing

The objective is to be able to deliver our product with the same level of efficiency, service, innovation, drive and effectiveness of the private sector while mitigating the risks and constraints in our unique operating environment.

The business-operating environment is complex and requires skills mix accounting authority with extensive understand of good governance. The subsidisation of rental by the City and Social Housing Authority (SHRA) mitigates the risk of going concern as the capital funding will ensure continued demand management in the social housing sector.

## 1. STRATEGIC OVERVIEW

The rental sector in South Africa is changing and evolving on a continuous basis since 1994. Currently, research shows that the rental housing sector in general can support substantial growth. As a result, in the past five years there has been an increased focus on the role of the rental sector in overall policy and strategic decisions. Moreover, the rental tenure option is seen as an effective tool for urban stabilisation, regeneration and local economic development. The changes in the rental housing environment are evidenced by the development of the National Rental Housing Strategy, and the rental model for South Africa (diagram below). In essence, the rental model proposes that an agreement exists between a tenant and a landlord to pay rental for and occupy a unit over a period. The monetary exchange in that relationship is the common denominator.

Since its inception in 2003, JOSHCO has become an important player in the social housing sector. A track record of delivering decent and affordable rental housing means that the company has consistently grown its property management portfolio over the years. JOSHCO remains an imperative social housing agency vehicle for the City and consistently strives to manage its market leadership position.

The organisation's implementing ethos is combining quality and quantity that seeks to improve the quality of life of the Citizens of the City. Joburg 2040- the City's long-term growth and development strategy has set high standards for the city to become a sustainable, resilient and a liveable world-class African City by 2040. JOSHCO anticipates meeting these standards directly through its development programme. The CAPEX budget allocated by the City and the SHRA subsidy has made it possible to facilitate improved capacity and implementation of large-scale projects within the corridors. As a strategic imperative, JOSHCO will continue to build partnerships with organisations that are aligned to the JOSHCO's objectives. These partnerships (construction companies and professionals) are being forged as the delivery of social housing within the corridors we prioritised.

## **2.1**

### **Vision**

To become the best provider of quality, affordable social housing designed to global standards.

## **2.2**

### **Mission**

To provide quality, resource efficient, economically sustainable and affordable housing products, in locations that guarantee convenience to our customers, which address the needs of the community and the environment within Johannesburg, underpinned by customer-focused service delivery and effective management.

## **2.3**

### **Values**

## Transparency

We will conduct business in an open, honest and transparent manner and comply with all legislative and governance requirements, and fully take responsibility of our decisions and actions.

## Customer Focus

At JOSHCO, we hold the customer very dearly to our hearts. We will do everything possible to ensure that we delight our customers in ways they want and to standards they themselves define.

## Efficiency

We strive to become resourceful in the way we do business. We will continuously innovate to better our business processes. We focus on achieving more from the resources at our disposal.

## Respect

We cannot exist or succeed independent of our clients, customers and partners. We respect every person whom we interact with and strive to treat our customers in a highly respectful & dignified manner.

## **2.4 Core Mandate/Purpose**

JOSHCO's mandate is to provide and manage social and affordable rental housing for the lower income market as an integral part of the efforts to eradicate the housing backlog in the City. It is a special purpose vehicle to access National and Provincial grant funding which a City or department cannot.

## **2.5 Legislation and policy environment**

JOSHCO is an entity of the City of Johannesburg that was established in line with the Municipal Systems Act and Companies Act. The entity was registered as a social housing institution in order for the municipality to deliver social housing to its constituency while access subsidy from

institution such as Social Housing Regulatory Authority. In terms of the Social housing Act, social housing is “a rental housing option for low to medium income households at a level of scale and built form which requires institutionalized management and which is provided by social housing institutions or other delivery agents in approved projects in designated restructuring zones with the benefit of public funding” and social housing institution is “an institution accredited or provisionally accredited under the Act which carries or intends to carry on the business of providing rental housing options for low to medium income households (excluding immediate individual ownership and a contract as defined under the Alienation of Land Act, 1981 (Act No. 68 of 1981)), on an affordable basis, ensuring quality and maximum benefits for residents, and managing its housing stock over the long term”. JOSHCO as Social Housing Institution (SHI) is expected to comply with the Social Housing Act.

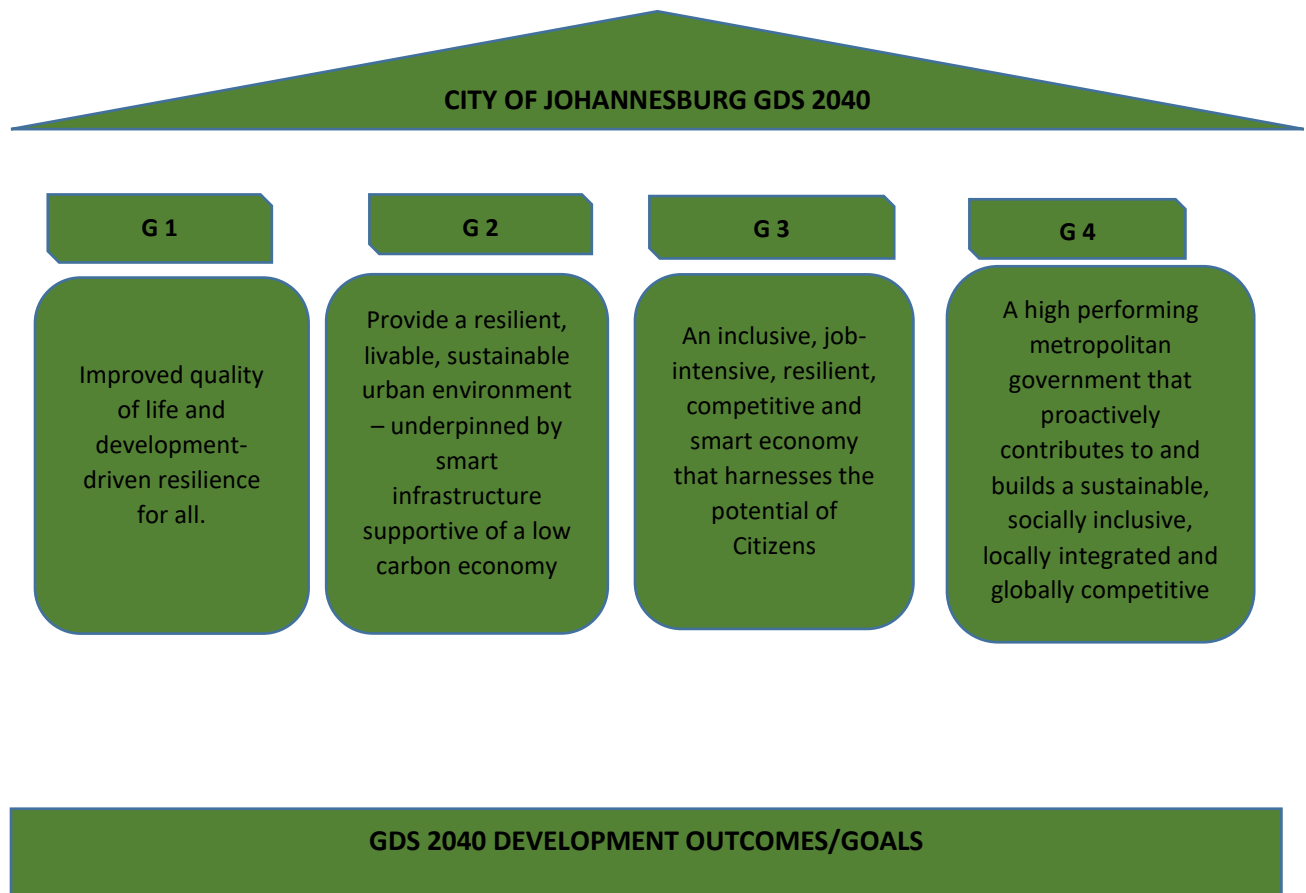

Furthermore, JOSHCO as an entity of the City of Johannesburg and must comply with the laws and regulations governing local government including the following:

- Provisions of the MFMA (budget preparation, management, reporting and procurement);
- Provisions of the SCM regulations (procurement and contracts management); and
- Municipal Systems and Structures Act (systems to guide the operation of the company)
- Align itself with City of Johannesburg, its parent municipality, strategic documents such as GDS 2040, IDP and SDBIP

In addition to the municipal laws and regulations, JOSHCO must also comply with the provisions of the Company’s Act which prescribes how companies must be managed and controlled.

## **2.6 Strategic Objectives - Aligned to COJ programme**

JOSHCO undertakes to ensure that its strategic plan is aligned to Growth Development Outcomes and strategic priorities as articulated in the Growth Development Strategy 2040 of the City of Johannesburg. CoJ has articulated 4 key goals that it aims to achieve by 2040, and which are premised on both the concept and aspiration of ‘a world class African City’. The Illustration below outlines the Growth Development Strategic Goals of the City of Johannesburg towards 2040.

**Picture: 1**

JOSHCO’s core business fully supports and drives each of the 4 goals. Under G1, JOSHCO will ensure that all tenants live in a safe and secure environment, and that there are concrete efforts to network families and build caring JOSHCO communities. Under G2, JOSHCO will priorities the low income-earning segment, especially previously marginalized South Africans, and provide a quality of life that restores their dignity as part of social redress. JOSHCO will strive to meet and exceed quality service provision whilst ensuring that the design and construction of its buildings meet environmental and climate change management practices. Under G3, JOSHCO will ensure that its housing solutions are provided within the proximity of commercial points and transport corridors in order to provide convenience of tenants to commercial activity. JOSHCO will also contribute to employment creation through its construction and rental management business. Under G4, we strive to become a highly customer focused SHI that listens to the needs and concerns of its customers, and that put into practice its core values of transparency, customer

focus, efficiency and respect. At institutional level, JOSHCO will strengthen its governance mechanisms and ensure that it becomes accountable at all times under all circumstances. In order to achieve the GDS outcomes and priorities, JOSHCO envisaged to achieve the following strategic objectives in the medium to long term period;

- Become a financial sustainable entity
- Contribute towards economic development through Broad Based Black Economic Empowerment
- Develop social housing projects within transport corridors, inner-city and greenfield (including suburbs and economic hubs)
- Contribute to mitigating Climate Change Impact
- Become a Customer Centric Company
- Strengthen Governance and Compliance
- Improve safety and security of all tenants in JOSHCO projects

The City of Johannesburg identified ten priorities to drive the GDS goals in the medium to long term. Furthermore, thirteen government of local units' programmes were identified for short to medium term implementation. JOSHCO has aligned its strategic objectives and programmes with the COJ strategic priorities and programmes as outlined in the table below:

**Table 1: Strategic Link between the IDP, GDS Priorities and Organisational Objectives.**

### 3.

## STRATEGIC ANALYSIS

### 3.1

#### Past Performance and Future Outlook

The housing backlog in the City has been a challenge for many years and the establishment of JOSHCO was an opportunity for the City to address the housing challenges and to improve the quality of life of the Citizens of Johannesburg. To date JOSHCO manages 8 515 rental units between green and brown fields. The value allows the City to position itself in the other areas of prospective developed to ensure that, JOSHCO continues to penetrate the market while addressing the spatial inequalities of the past.

#### ***Past Performance***

In the 2018/19 financial year the organisation continued to strive for the achievement of the Institutional and administrative KPI's against its targets and the revenue target as both targets drive the performance of the organisation from the capital and expenditure budget point of view. Below are the highlights of the results for the aforementioned financial year: -

- Capital expenditure was 98% against a budget of R321 million;
- Revenue year on year increase by 14% from R141.7 million to R150 million.
- Number of units developed and completed was 297 against a target of 360 units;
- Occupancy rate was 99% against a target of 98%;
- Stakeholder engagement was 172% against a target 100%;
- Spending on 51% black owned companies was 69% of R 258.4 million;
- Deficit was R 34.7 million mainly due to the increasing utility cost and rental debtor's impairment.

#### ***Future Outlook***

The organisation will continue to focus on improving its market share by positioning and delivering on what matters most in its market segment. The development strategy will continue to focus on addressing the legacy of the unjust apartheid spatial development approach. It (JOSHCO) plans to diversify its portfolio and broadened its focus to urban areas and in economic hubs where it intends to cement its social and affordable housing footprint. The need to explore the Northern and Southern suburb market is part of the organisation's new strategy to develop social and affordable housing in areas outside spatial development or previously disadvantage geo-areas.

The new strategy aims to tap into markets that compete on high rental fees. Both the Northern and Southern suburbs have remained the market ground for private developers and that positions the organisation as a last market entry with market intelligence and experience curve to compete amongst the elite rental accommodation providers while ensuring that, the introduction of social and affordable housing does not dilute the current market property value in the earmarked areas and/or City Regions.

Furthermore, research intelligence from Statistic South Africa indicates that, the population in the Gauteng Province has grown by 46% since 2002 and that, the labour force has also grown by 2% from January 2018 to March 2019. More of the research results also showed that the organisation needed to explore the economic hubs and suburban market offerings which then diverts the organisation to areas such as Midrand, Randburg and, Fourways as they are areas that offer some of the most rapidly expanding and developing commercial and residential nodes in Gauteng

The lower income earning residents in the City who reside in the peripheries of the City travel more than 25km on average to their place of work, which could then be alleviated through the new strategy to penetrate areas that are closer to economic activities. In the next 3 financial years, JOSHCO will invest over R1,3 billion in both Green Fields and Inner-City project portfolio which will yield 2920 social and affordable rental units of which majority will be at economic active areas. The investment will form part of JOSHCO's medium to long-term geographical footprint and as such will sustain its number one position in the Social Housing Sector. While the investment will attract further long-term development, it will also seek to address the much-needed low-cost housing demand while ensuring that beneficiaries benefit from living in well developed areas that offer social and other needed amenities to further enhance their quality of life.

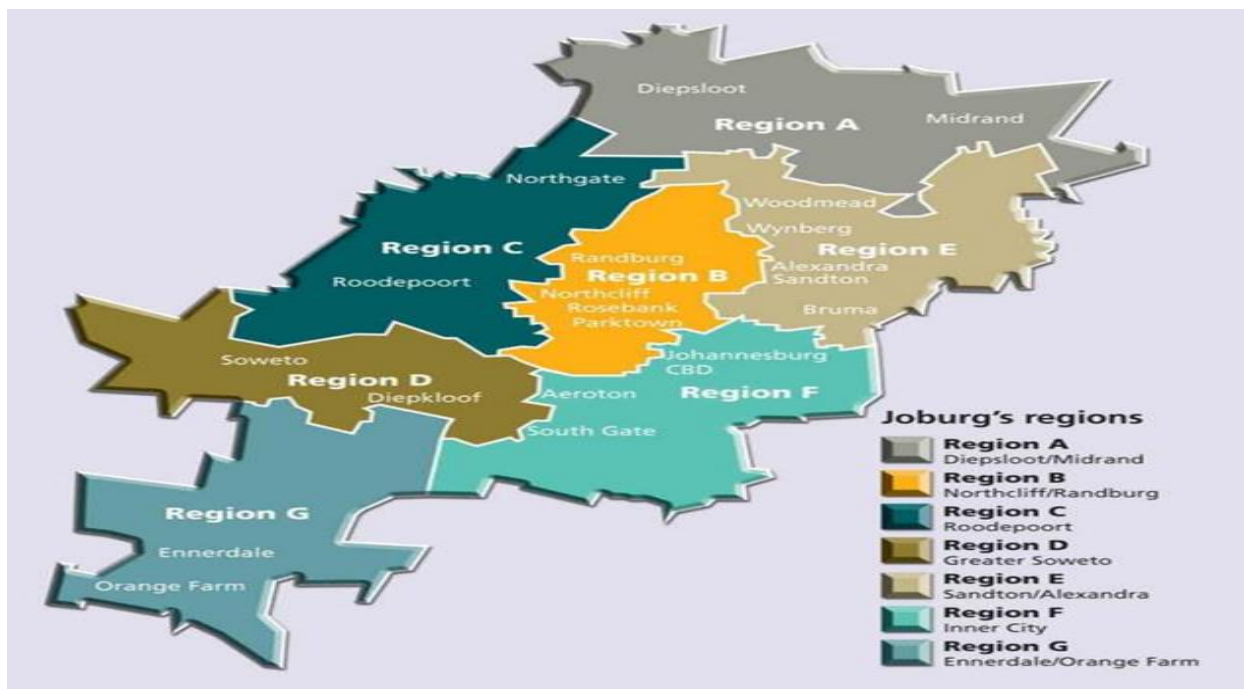

The Social Housing Regulator Authority (SHRA) as one of JOSHCO's key stakeholders will also invest a projected amount of R230 million in the next 3 financial years which will be re-directed to the new but, also exciting developments in geo-areas such as Midrand, Sandton, Lufherheng and, Enerdale. Out of 2920 units projected for the next 3 financial years, 815 units will be developed through Turnkey projects and will partially fund with R230 million from SHRA. JOSHCO envisages to convert some of the inner-city buildings into student accommodation and the project will start from the 2020/2021 financial year which will see JOSHCO positioning itself to enter the student accommodation market as part of its additional business segment. An amount of R378 million has been projected for capital expenditure spending in the 2020/21 FY and a proportion of the value will be directed to student accommodation. The vision towards student accommodation is that of

a student precinct which means safer accommodation through sound security and a technologically advanced environment based on the SMART City approach.

JOSHCO as an entity of City of Johannesburg aligns itself with all city plans that are relevant to entities. The City has Smart City as one of its priorities wherein departments and entities are required to incorporate in order to respond in designing smart Joburg City. JOSHCO has a number of initiatives intended to respond to SMART City priority that will be implemented starting from the 2020/21 financial year and this include the introduction of the JOSHCO App, Security upgrade at projects, installation of prepaid water and electricity meters, and rainwater harvesting system. The initiatives aim to enhance JOSHCO engagements with the citizens to ease access to our information and services, make projects safer, sustainable, liveable and resilient.

Over and above the aforementioned, a projected amount of R 216 million will also be invested over the next 3 years in maintenance of the projects. The investment will ensure that JOSHCO sustains market attractiveness for financial and demand growth and, contributing towards global positioning of Johannesburg.

The picture below depicts the organisation's futuristic footprint in areas

Picture 2

**Table 2: Outlook of Organisational Future Geographical Footprint.**

<b>REGION</b>	<b>AREA</b>	<b>CONTRACTING STRATEGY</b>	<b>NO OF UNITS</b>
<b>REGION A</b>	TBC	Turn-Key 1	Phase one: 350 units Phase two: 400 units
<b>REGION B</b>	TBC	Turn-key 2	Phase: 500 units.
<b>REGION D</b>	TBC	Turn-key 3	Phase: 550 units.
<b>REGION E</b>	TBC	Turn-key 5	Phase one: 650 units.
<b>REGION F</b>	Rissik Street, Booyens Place	Inner City programme.	500 social housing units.
<b>REGION G</b>	TBC	Turn-key 5	400 social housing units.
<b>Total</b>			<b>3350 units</b>

**NB:** the areas where the Turn-key projects will be developed will be confirmed once expression of interest is finalised

The above turnkey developments will see the organisation growing its Green Field project portfolio by 3350 units upon completion. The location of projects within City Regions will be confirmed once the expression of interest process is completed.

### **3.2 Turn Around Strategy**

JOSHCO has experienced challenges that affected the company performance over the years ranging from turnover of executive, budget cut and unfavorable economic climate that negatively affect tenants. In response to challenges that threaten the future operation of the company, different strategies envisaged to enhance revenue and contribute to the financial sustainability of the company will be implemented in the 2020/21 FY.

The following are different strategies that the company is finalizing for implementation in the 2020/21 Financial Year

1. Student Accommodation

JOSHCO has observed that a limited number of students stay on campus and that the existing student accommodation market is unable to cope with demand. This creates a huge off-campus accommodation market, which has compelled many students to live as backyard dwellers or become victim of unregistered landlords who charge exorbitant rental amounts. JOSHCO has identified the accommodation gap in the student accommodation sector and intend to penetrate the market as part of its revenue diversification. JOSHCO will acquire buildings from Johannesburg Property Company that are within the vicinity of Institutions of Higher Education suitable for conversion into student accommodation with the long-term plan of developing a JOSHCO student accommodation precinct. The Primary goals that JOSHCO has in providing Student Accommodation are to:

- Enhancing and facilitating the living and learning experience of students within a diverse student accommodation community.
- Contributing to academic success for previously disadvantaged communities by providing living environment that is conducive for learning.
- Build a diverse student profile that reflects the demographics of the South African Society.

Over the next 5 years JOSHCO would have 10 000 beds in the student accommodation and this will be driven by the outcome of the current pilot project planned to deliver 183 beds. A budget of 5 million is allocated for the conversion of buildings into student accommodation in the 2020/21 financial year. Wolmaransa building has already been identified as a student accommodation project in the 2019/20 financial year and procurement of a company to do retrofitting and management thereof has been concluded. The commencement of the work is dependent on the 2020/21 FY budget. JOSHCO has forged relationships with one of the University in Johannesburg and National Student Financial Aid Scheme (NFSAS) wherein student rental will be administered through either of the two institutions and the approach guarantees JOSHCO of maximum rental collection. Different student accommodation management models are being contemplated with options of involving private sector, NFSAS and other role players.

## 2. Turnkey projects

Turnkey projects remain part of the organisation's strategy to deliver social and affordable housing in record time and in large number. Such projects are executed through the use of contractor funding and once the development has been completed to the requisite specification, the contractor will then claim the total value of the project. As indicated in the above section Turnkey projects are targeted for implementation in the economic hubs where JOSHCO will target workers

that commute daily from their residential places that are mostly in the periphery of the inner-city and suburban areas of Johannesburg to their place of work. Through turnkey projects, JOSHCO will grow its portfolio with more than 3000 units in the next year and will witness its footprint in most of the City Regions.

### 3. Regularisation of illegal tenancing

JOSHCO has conducted an occupancy audit throughout its projects with the main objective of identification of the citizenship of the tenants. The occupancy audit together with internal audit revealed that JOSHCO has tenants that do not have valid lease agreements. This mainly as a result of the passing away or has relocation of the lease holder leaving the unit under the care of the lease holder's dependences, which in some instances are children. The afore mentioned challenge has affected rental collection since some of the tenants discontinued to pay and/or are unemployed and can not afford. A robust process of regularising tenants without a valid lease agreement will see the company's properties occupied by qualifying tenants. There will be applications for evictions for non-qualifying tenants who refuse to vacate the illegally occupied units. Child-headed homes will be referred to relevant departments in the City of Johannesburg for assistance.

### 4. Outdoor advertisement

In order to diversify our revenue streams, the entity will venture into the outdoor advertising space. We currently have a billboard in one of our inner-city buildings. We are looking into getting a panel of service providers to investigate outdoor advertising opportunities in our buildings.

### 5. Generate revenue for work executed on behalf of other City departments and entities

In the 2019/20 financial year, a special projects unit was created. The unit has been instrumental in facilitating the work that the company is currently executing on behalf of the Department of Housing at a management fee of 7%. JOSHCO will continue using the strategy as its additional revenue stream. Other departments such as Department of Social Development has expressed interest in involving JOSHCO on the execution of their major repairs and maintenance work and negotiations are already at an advance stage. This will therefore further our scope of work executed on behalf of other departments and increase revenue.

## 6. Utilities

A major expense line item for the entity is utilities which are not charged to tenants. We plan on developing a pre-paid vending system where we will be able to recoup all costs not directly incurred by the entity.

Further to this we will be installing solar systems for common area lights in order to save on energy costs. There is also a water harvesting programme which will be launched in our large projects who consume a lot of water for the gardens in order to assist in saving water costs.

## 7. Rental Collection

JOSHCO has witnessed a decline in rental collections due to various factors including the economic slowdown that resulted in high unemployment. Though measures are put in place to provide rental relief to qualifying tenants, JOSHCO has identified the culture of defaulting by tenants that afford. In response to under collection, the company has appointed a debt collection company that will assist in collecting historical debts for a period of 3 years. Secondly, JOSHCO is in discussion with the debt collection department in the City seeking assistance with collection of rental from all state employees through salary garnish process that only the municipalities can enforce

### **3.3 Environmental Analyses**

Environmental analysis process allows the organisation to identify its internal strengths and weakness and external factors that will impair its strategic objectives. The analysis also aids the assessment of the control environment against the inherent and identified risks based on change in regulatory, policy, operational systems, geopolitical landscape and, market perception. An environmental analysis was undertaken to assess the organisational position in relation to internal and external environment in order to develop strategies that will respond to adverse organisational environment.

#### **3.3.1 SWOT**

##### **Table 3: Organisational Strength and Weakness**

Strength	Weakness
<ul style="list-style-type: none"> <li>• JOSHCO is the largest SHI, and one of the 12 only fully accredited SHI's in the country. This provides an opportunity to attract quality stakeholders <ul style="list-style-type: none"> <li>○ Funding</li> <li>○ Investments</li> <li>○ Private Partnership Investments</li> <li>○ Technical Partners</li> </ul> </li> <li>• The new, highly energised leadership team brings into JOSHCO a promise and prospect to refresh the culture and transform the performance of the Company. There is a wish that this leadership remains in place and is given every possible chance to deliver</li> <li>• JOSHCO's housing solutions are price competitive. This puts the Company in advantage position on market development as it pursues an aggressive growth strategy in the next 5 years.</li> <li>• JOSHCO's units are of a comparatively high quality (size, design value added services), relative to price, which gives the company leverage on attraction and retention of tenants.</li> <li>• JOSHCO boasts of a functional Board of Directors as well as other</li> </ul>	<ul style="list-style-type: none"> <li>• There is a perceived weak internal control environment, exacerbated by a poor application of risk management - this has manifested from recent audits</li> <li>• Currently there is no specialised function to perform Research &amp; Design (R&amp;D) focused on improving JOSHCO's market understanding and informing its investments strategy &amp; priorities</li> <li>• JOSHCO remains limited to social housing because of its legal framework. Social housing and profitability remain difficult concepts to reconcile - it places a limit on its profitability.</li> <li>• The current manual process environment is not only a financial cost driver that induces serious inefficiencies into the company's operations, but also a driver of poor customer satisfaction</li> <li>• JOSHCO's culture is weak and unsuitable for a company whose going concern prospects hinge on entrepreneurship, competitiveness and achievement of financial sustainability. There is need for an organisational culture overhaul.</li> </ul>

Strength	Weakness
governance structures. Going forward, the company is better poised to attract and retain quality stakeholders based on the goodwill that is created by the stable governance structure.	

**Table 3.1: Organisational Opportunities and Threats**

Opportunities	Threats
<ul style="list-style-type: none"> <li>• The Government of South Africa’s Human Settlement policy has highlighted Social Housing as a key programme. JOSHCO must leverage on political goodwill to attract adequate funding for its housing development projects.</li> <li>• JOSHCO has a unique opportunity now to set up and operationalize a specialised function to perform R&amp;D in order to enable researched and fully appraised investments strategies and priorities</li> <li>• There is an opportunity to strengthen Corporate Social Investment to enhance the reputation of JOSHCO whilst at the same time addressing critical business objectives such as market development</li> <li>• There are opportunities to leverage of Technology to assist in climate change through Smart City models. 4IR</li> </ul>	<ul style="list-style-type: none"> <li>• The nature of JOSHCO’s business and operations means that several legal frameworks directly affect its operations. This creates complexity in operations, increases the possibility on non-compliance, and demand investment in legal skills.</li> <li>• South Africa’s current ranking of no. 88 on the construction sector’s ‘Ease of Doing Business’ index threatens access to funding &amp; place a premium on funding housing development</li> <li>• Recent downgrade of SA by Moody’s and the general economic slowdown will likely further depress capital investment whilst also increasing the cost of accessing funding</li> <li>• The already high, and still increasing unemployment rate will adversely affect revenues through default – there is need to rethink / reprofile JOSHCO’s tenantry model</li> </ul>

Opportunities	Threats
<p>provides opportunities to reduce maintenance costs, improve quality of accommodation, achieve superior tenant experience, etc.</p> <ul style="list-style-type: none"> <li>• There are opportunities for targeted Urban Agriculture that can be enabled through innovative housing design models (roof top gardens)</li> <li>• There are opportunities for biodiversity preservation, which can be used to strengthen funding attraction and the co-management of JOSHCO's housing assets, for mutual benefit.</li> <li>• Access to municipal owned assets remains a strategic opportunity that JOSHCO can fully exploit. Convenient location of housing will improve uptake and reduce tenant churn.</li> <li>• JOSHCO is pursuing the Shareholder in order to transfer the properties that are under its management to JOSHCO's books. This will assist with improvement of the company solvency status.</li> <li>• Market diversification through student accommodation projects</li> </ul>	<ul style="list-style-type: none"> <li>• Recent Cyber-attacks on CoJ and several SA Banks signals the potential for increased cyber hacks with disruptive and costly financial implications on business.</li> <li>• Citizen activism has seen, for first time, social housing protests (over &amp; above service delivery protests). This now includes the pressure of Tenants to own property – JOSHCO business model must be geared to respond to this emerging development</li> <li>• The combined impact of urban migration (urbanization) and foreign migration (immigration), both legal and illegal, threatens our ability to meet housing demand and deliver satisfactory service to tenants.</li> <li>• Long legal processes for evictions, and new laws that entrench consumer rights, remains a big threat to revenue assurance.</li> <li>• Long legal processes for evictions, and new laws that entrench consumer rights, remains a big threat to revenue assurance</li> <li>• Changes at Political Leadership levels brings policy direction changes, hence investment priorities and thrust also changes</li> </ul>

Opportunities	Threats
	<ul style="list-style-type: none"> <li data-bbox="873 243 1390 380">• Natural Disaster such as the COVID 19 pandemic threatens the mandate and current operations at JOSHCO</li> </ul>

**3.2.2 PESTEL**

**Political** – The financial year 2021 will witness the beginning of the local Government Election Cycle, which could affect JOSHCO’s mandate, goals and strategies, through new Political Policies, legislations and priorities. Housing will always remain a high political standpoint in South Africa.

**Environmental** – There are constant changes to the environment, impacting the way that we affect the environment, as well as how the environment affect us. JOSHCO always endeavours to find new ways of improving tenant quality of life, as well as safeguarding the environment. This includes ensuring that resources are sustained, waste is managed, and finding ways to provide renewable energy sources.

**Social** – JOSHCO as a Social Housing Institue, is driven by the needs of society. JOSHCO aims to fight homelessness and poverty, by providing housing oppertunities in a market space where tenants would not be able to obtain housing through normal markets. However, the needs of society are ever increasing due to high influx into the City of Johannesburg, this giving an increase in the demand for rental accomodation.

**Technological** – Technology is key in ensuring that JOSHCO can empower its tenants with access to information, as well as provide easy and convenient ways to interact with JOSHCO. This however does provide increased dependancies and reliance on technology legislations and governance.

**Economy** – The economical factors play an important and crucial role in JOSHCO’s service delivery, and is affected by the exchange rates and household economies to ensure that JOSHCO can still provide services to its target markets.

**Legal** – Governance, legal and compliance play a critical aspect in maintaining a healthy organisation, and therefore JOSHCO needs to ensure that it adheres to the required and relevant legislations.

### 3.4

### Risk Management

The governance of risk is vested to the Board of Directors (Governing Body) by the shareholder of the organisation. In the current financial year, the JOSHCO Board continued subscribe and to implement Principle 11 of the King IV report on Corporate Governance for South Africa 2016, as the principle guiding the Board in managing the governance of risk which states, “The governing body should govern the risk in a way that supports the organisation in setting and achieving its strategic objectives”. To that effect, the strategic risk assessment for the current financial year was undertaken in line with the recommended practices of the aforesaid principle which are as follows:

- The governing body should assume responsibility for the governance of risk by setting the direction for how risk should be approached and addressed in the organisation;
- The governing body should treat risk as integral to the way it makes decisions and execute its duties;
- The governing body should evaluate and agree the nature and extent of the risks that the organisation should be willing to take in pursuit of its strategic objectives;
- The governing body should delegate to management the responsibility to implement and execute effective risk management.

The Board further addressed the compliance requirements of section 62(1)(c) of the Municipal Financial Management Act (MFMA) which states that, “The Accounting Officer must ensure that, the Municipal Entity has and maintains an effective, efficient, and transparent system of financial, risk management and internal control”. The more clearly an organisation can state its mission and objectives, as well understanding its strengths and capabilities, the more directly it can navigate to identify key risk areas to develop mitigating plans. Below are the top five strategic inherent risks that continue to face the organisation throughout its existence.

### 3.4.1 Top Five Inherent Strategic Risks

- 1) Low rental revenue;
- 2) Inadequate capital budget allocation by the City resulting to JOSHCO not being able to meet its business plan target of providing affordable rental and social housing units;
- 3) Increase in construction cost of JOSHCO projects due to international trade restrictions
- 4) Inadequate Customer Relationship Management
- 5) Poor public relation with communities

### 3.4.2 Continuously Emerging Risk

Emerging risks are identified throughout the financial year and risk intelligence is gathered as part of the process of identifying meaningful risks faced by the organisational at a particular period of the financial year. Inherent risks have been assessed and mitigation strategies have been put in place. No other emerging risk have been identified except that of geopolitical risk. Annexure A to the plan is the detailed risk assessment register for the 2020/2021 financial year.

Risk Description	Inherent Rating	Residual Rating	Root Cause	Impact	Risk Control
<b>Geopolitical Risk</b>			Potential tenants using regional political structures to secure units without following process.	<ul style="list-style-type: none"> <li>• Not being able to tenant on projects within the set timeline.</li> <li>• Projected revenue from affected projects resulting loss exposure.</li> <li>• Vandalism of projects which delays the tenanting of qualifying applicants.</li> </ul>	<ul style="list-style-type: none"> <li>• Insure all new projects prior to tenanting to prevent delays in the refurbishment works in an event of vandalism.</li> <li>• Engage the office of the MMC for management of political boundaries.</li> <li>• Continue with stakeholder engagement</li> </ul>

- Negative market perception. and public participation meetings.

### 3.4.3 COVID 19 impact and JOSHCO's response

Historic information indicates that areas that were more severely affected by the 1918 Flu Pandemic experienced a sharp and persistent decline in real economic activity.

Secondly, we find that early and extensive Non-Pharmaceutical Interventions (NPI) (i.e. Social Distancing) have no adverse effect on local economic outcomes. On the contrary, cities that intervened earlier and more aggressively experience a relative increase in real economic activity after the pandemic.

Altogether, research findings suggest that pandemics can have substantial economic costs and NPIs cannot only be means to lower mortality but may also have economic merits by mitigating the adverse impact of the pandemic.

With respect to the economic effects of the pandemic, research indicates that more severely affected areas experience a decline in manufacturing employment, manufacturing output, bank assets, and consumer durables after 1918, relative to less severely affected areas.

It should be expected that South African entities will experience a massive reduction in value and possible closure due to a decline in economic activity within the country. JOSHCO will not be an exception to this phenomenon.

The outbreak of any pandemic brings with it devastating economic impact to global economies with direct impact felt within local and regional economic hubs.

As an active participant in the global economy, South Africa experienced economic shock due to Lock down measures that stopped all activities except those that were categorised as essential services.

Beyond the Pandemic, a new business phenomenon will develop and mature to become the new normal beyond the 21<sup>st</sup> Century

The following measures were put in place to ensure that JOSHCO operations continues

- JOSHCO has established a COVID 19 Committee that meet regularly to monitor implementations of precautionary measures and to ensure that all regulations are followed as and when government releases them.
- A detailed COVID 19 containment and prevention plan has been developed and is monitored constantly by the COVID 19 Committee and Executive Committee.
- COVID 19 risk assessment was conducted and the risk register compiled. The register is reviewed constantly.
- Different platforms such as a dedicated WhatsApp, posters, website and social media are utilised as the communication strategy to interact with tenants/prospective tenants as a way of limiting personal interaction.
- Tenants that lost income due to the pandemic are encouraged to apply for a rental relief that JOSHCO has introduced to assist tenants that no longer afford to pay rent.
- Posters on precautionary measures were placed in common areas of all JOSHCO projects in order to create awareness.
- JOSHCO Cleaners, Securities and Supervisors at projects were provided with protective equipment.
- JOSHCO has made two of its buildings available to be utilised for quarantine and self-isolation by the City. Affected JOSHCO tenants will also benefits to the utilisation of the buildings as the City caters for all its citizens.
- IT infrastructure was enhanced to support remote operations i.e. laptops were procured, and virtual private network (VPN) installed for easy access of server-based systems. JOSHCO to continue investigating and implementing IT solutions to ensure that the business continues efficiently and effectively.

### **2021 initiatives in response to COVID 19**

- JOSHCO has decided to consider payment relief on a case by case basis from application made by tenants. Communication was sent to tenants together with May 2020 statements to contact the revenue department should they be negatively affected by COVID-19.

Considerations will be given for the following situations:

1. Income has been reduced.
2. Temporarily have no income.
3. Permanently lost income.
4. Business income reduced.

Based on a tenant's financial position, relief will be given for up to 3 months to recover. Monthly billing will continue and interest will be charged on outstanding balances. Payment arrangements of up to 12 months will be entered into.

JOSHCO's current 3-month collection average is R26.2 million. The impact of freezing the payment for 3 months is presented below ranging from R2.6m at 10% up to R13m at 50%.

#### Impact of COVID-19 on collections

		Option 1	Option 2	Option 3	Option 4	Option 5
Loss collection %		10%	20%	30%	40%	50%
	<b>Average 3 months collection</b>	<b>Potential Lost Collections</b>				
<b>Tenant classification</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>
Residential tenants	22,330	2,233	4,466	6,699	8,932	11,165
Commercial tenants	3,155	315	631	946	1,262	1,577
City referral projects	701	70	140	210	281	351
	<b>26,186</b>	<b>2,619</b>	<b>5,237</b>	<b>7,856</b>	<b>10,474</b>	<b>13,093</b>

- No physical consultation with tenants on their accounts, only telephonically, email, SMS and JOSHCO APP. Where necessary and if tenants have the resources, online meetings to be scheduled.
- No physical exchange of paper for supply chain management process. All Request for Quote (RFQ's) and Tender documents to be issued and submitted electronically only. Site briefings to be done online only.

- Automation of the unit’s application process for potential tenants to minimise personal contact.
- The office spaces would be designed such that the ergonomics complies and promotes social distancing.
- Additional two buildings owned by JOSHCO would be re-developed and made available for self-isolation and quarantine purpose as part of response to COVID-19 and this will be subject to additional budget being made available:

**Rissik Street:** this is an existing building owned by JOSHCO, located within the Inner City with a potential to deliver 300 units.

**Booyens Place:** the building is owned by JOSHCO with a potential unit yield of 200 units to be utilized as quarantine and or isolation facility.

**4.4****Service Standards Charter**

<b>Core Service</b>	<b>Service Level Standard Target</b>
Billing of customers	98% accurate bills of all active customers.
Attending to requests for maintenance	96 % of maintenance requests attended within 7 working days of the logged call.
Routine building maintenance	Once per year and as when required.
Application of rental housing	Outcome of enquiry to be sent to application within 5 days.
Application of rental housing	Outcome of the application communicated within 7 days.
Resolution of complaints	Acknowledgement and response within 24 hours of complaint being logged.
Resolution of complaints	Resolution within 5 working days of logged call.

JOSHCO is a customer focused organisation and takes service delivery with pride as part of its priority to customer need(s) satisfaction. The above table represents the customer focused service standards targets that the organisation will aim to achieve in order to achieve its customer satisfaction survey target and continue to deliver service with pride. The above standards are agreed upon through a service level agreement that JOSHCO has signed with the Shareholder.

**4.5****Performance Monitoring, Evaluation and Reporting**

Monitoring and evaluation are different yet complementary.

Monitoring is an on-going systematic process of collecting, analysing and using information to track programmes progress toward reaching its pre-determined objectives and targets. This is achieved through reporting on actual performance against the planned targets. Monitoring is conducted after a programme has begun and continues throughout the programme implementation period. It also provides internal and external stakeholders (management, shareholders, beneficiaries, implementers etc.) feedback about the progress of a project.

Furthermore, through monitoring, the organisation can identify problems which might hinder achievement of pre-determined objectives and targets and it also guides management to make informed decisions.

Evaluation, on the other hand, is time-bound and periodic process that involve systematic collection and objective analysis of evidence on public policies, programmes, projects, functions and organisations to assess issues such as relevance, performance (effectiveness and efficiency), value for money, impact and sustainability and recommend ways forward. It gives information about why the project is or is not achieving its targets and objectives. Evaluation can be undertaken for the following four primary purposes:

- improving performance (evaluation for learning);
- evaluation for improving accountability;
- evaluation for generating knowledge (for research) about what works and what does not and;
- Improving decision-making.

## LEGISLATION AND POLICY

The mandate for the establishment of an M&E framework derives from internal and external legislative and policy imperatives. The legislation listed below inspired the M&E framework.

- ✓ The Constitution of the Republic of South Africa that requires transparency, accountability and the promotion of good governance;
- ✓ Government Wide Monitoring and Evaluation Policy Framework;
- ✓ National Treasury Framework for Programme Performance Information Management;
- ✓ National Evaluation Policy Framework, 2011;
- ✓ Promotion of Access to Information Act, No. 2 of 2000 (Sections 11 and 15 (1)(b));
- ✓ National Archives of South Africa Act, No 43 of 1996 (Section 3);
- ✓ Statistics Act, No 6 of 1999 (Section 2);
- ✓ Public Finance Management Act, 1999 (Sections 2, 38 and 40(f)); and
- ✓ Municipal Finance Management Act,

## JOSHCO PERFORMANCE MONITORING, EVALUATION AND REPORTING PROCESSES

## **Monitoring Process**

Throughout spheres of government, the performance information reported in accountability documents enables Parliament, provincial legislatures, municipal councils and the public to track government performance, and to hold it accountable. Performance information is also made available to managers at each stage of the planning, budgeting and reporting cycle so that they can adopt a results-based approach to managing service delivery. This approach emphasises planning and managing with a focus on desired results and managing inputs and activities to achieve these results. Performance information is structured to demonstrate clearly how JOSHCO uses available resources to deliver on its mandate.

## **Evaluation Process**

JOSHCO's evaluation process is intended to improve decision making, improve performance and accountability. Key programmes such as EPWP are identified for evaluation of its long-term impact.

## **Reporting Process**

The National Treasury has developed two monitoring and reporting systems to integrate planning with budgeting systems that cater for financial and nonfinancial information. In-year implementation and monitoring of service delivery and the budget is conducted through the quarterly performance reports and the monthly financial reports respectively. End year reporting constitutes reporting on outputs against pre-determined targets and reporting on annual financial statements. The City of Johannesburg performance reporting framework that provides guidelines across city departments and entities is aligned to the National Treasury one.

## **In-year monitoring reports**

In year monitoring of JOSHCO's performance will be done through quarterly performance reports and monthly expenditure reports as entranced in section 71 and 72 of the MFMA. The quarterly performance reports provide progress on the implementation of the institutions' annual performance plan with emphasis on monitoring delivery against planned quarterly targets. Monthly expenditure reports are used to monitor actual spending against planned spending. These reports are also used to alert managers where remedial action is required in-year, based on both financial and nonfinancial information. Value for money is an important objective in budgeting. In support of this, quarterly performance targets are compared to actual expenditure in an effort to link service delivery with spending data.

## **Annual reports**

The annual report process is guided by section 121 of the MFMA, MFMA circular 63 and the international Reporting Framework that has been adopted by the City. The annual report is the ultimate accountability document in JOSHCO. It is linked to the implementation of the annual performance plan and the budget. It focuses on the institution's performance relative to the targets set in the annual performance plan and also indicates how the budget was implemented in accordance with the service delivery outputs. The relationship and alignment of the planning, budgeting, reporting, monitoring and evaluation documents is made possible through appropriate budget programme structures. Budget programme structures provide the key link between our objectives and its detailed operational budgets. The budget programme structure at our disposal provides a stable platform, linking successive plans and strategic priorities to budget allocations and performance indicators that track delivery over the medium to long term.

### **5.**

### **FINANCIAL IMPACT**

#### **5.1**

#### **Budget and Sources of Funding**

The capital budget funding is attained from the City based on the number of affordable rental units to be developed in a financial year. Another source of funding is attained through application of capital funding from SHRA as part of the achievement of the organisational rental stock growth projections. The organisation projected operational budget is based on the number of social housing and affordable rental units under its current management. Rent collected is allocated to all operational expenditure items in order to ensure continued and efficient operations.

#### **5.2**

#### **Operational Expenditure**

The principle pertaining to the implementation of the business plan is centered on accountability and transparency, efficiency and effectiveness, commitment, time consciousness, prudent financial management and coordination and collaboration with other departments.

**Table 7: The Finance Department is guided by the following 4 Strategic Objectives: -**

Strategic objective	Key Performance Indicators
Capital Project Management	95% Expenditure spent on development programme.
Disciplined Expenditure management	Achievement of selected profitability and liquidity ratios.
Optimal Revenue Collection	95% Collection of debtors in respect of rental.
	10% Collection of historical debt
Enhanced corporate governance, through 100% compliance with financial risk and performance management guidelines.	Unqualified audit.

### Strategic Framework

**Table 8: The Strategic Framework of the Finance Department is Summarised in the Table below.**

Focus areas	Goals	Strategies	Outcomes
1. Successfully monitor and evaluate the operational budget	1.1 To ensure that the operational budget is between 0% -3% under budget.	Conduct Monitoring & Evaluation on the management accounts and minimise Operational cost	<ul style="list-style-type: none"> <li>▪ An effective M &amp;E system in place and operational.</li> <li>▪ Proper controls and ops manual</li> </ul>
	1.2 To spend 95% - 100% of capital expenditure	<ul style="list-style-type: none"> <li>▪ Develop an effective relationship with stakeholders (COJ, Housing Development etc.)</li> <li>▪ Invoices to be directly submitted to SCM for capturing</li> <li>▪ Making sure that suppliers are paid within 30 Days</li> </ul>	Reduce turnaround time to maximum of 5 days for CAPEX claims.

Focus areas	Goals	Strategies	Outcomes
	1.3 To encourage all internal stakeholders on cost savings	<ul style="list-style-type: none"> <li>▪ To request only needed products e.g. Tools of trade</li> <li>▪ Internalize M&amp;E amongst JOSHCO's Department</li> </ul>	<ul style="list-style-type: none"> <li>▪ Ability to monitor and evaluate and manage cash flow.</li> <li>▪ Cooperation in reducing cost from all departments</li> </ul>
2. Effectively manage human, financial and physical resources	2.1 To ensure adherence to all SCM regulations in the awarding of tenders	Consult relevant stakeholders	Policies and procedures to guide staff and management in place.
	2.2 To develop and implement required policies and procedures	<ul style="list-style-type: none"> <li>▪ Review and modify existing policies</li> <li>▪ Disseminate policies to other departments</li> <li>▪ Monitor the implementation of policies</li> </ul>	Human, financial and physical resources effectively utilised.
3. Sustainability of JOSHCO and its operations	3.1 To effectively collect 95% of billed revenue	<ul style="list-style-type: none"> <li>▪ Target specific projects for collection as special project</li> <li>▪ Place speed point in all projects.</li> <li>▪ Drive &amp; prioritise the Debit Order initiative and deduction forms for MOE's and set it as a prerequisite for new application.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Strengthen internal Controls and maximise performance.</li> <li>▪ Programs that ensure sustainability of JOSHCO at all levels developed and implemented.</li> </ul>

Focus areas	Goals	Strategies	Outcomes
	3.2 Revenue Drive for Non-performing projects	<ul style="list-style-type: none"> <li>▪ Empower communities with education workshops and sign Debit order forms.</li> <li>▪ Minimise the accounts for legal handover</li> <li>▪ Identify all 60 days arrear accounts and refer them to housing tribunal for mediation</li> <li>▪ Provide both technical and financial support at all levels.</li> <li>▪ All overdue accounts to be converted to debit order.</li> </ul>	Sustainability policies and plans developed.
	3.3 To clean current database	<ul style="list-style-type: none"> <li>▪ Identify terminated accounts and remove them from the books.</li> <li>▪ Monitor active &amp; non-billing accounts.</li> <li>▪ Work on each project with specific strategy depending on its challenges</li> </ul>	Complete and accurate financial records to avoid adverse audit outcomes in revenue management.

Focus areas	Goals	Strategies	Outcomes
	3.4 To reduce the large debt book	<ul style="list-style-type: none"> <li>▪ Outsource debt of 120 days and more to debt collectors.</li> </ul>	Reduction of the debt book.
4. Implementation of an integrated system that enables efficient cash flow management	4.1 To improve turnaround time for cash flow management (CAPEX)	<ul style="list-style-type: none"> <li>▪ Promote improved movement of invoices from the departments to finance then to COJ.</li> <li>▪ Provide training on the audit process to other department heads</li> </ul>	Proper financial records are kept and traceable for further relationship improvement.
	4.2 To facilitate and coordinate the initiation of capital projects	<ul style="list-style-type: none"> <li>▪ Update contract register for awarded contracts.</li> <li>▪ To ensure that all SCM regulation are adhered to in the awarding of contracts.</li> </ul>	Proper controls are in place.
5. Effectively collect billed revenue	5.1 To deal with old overdue accounts	<ul style="list-style-type: none"> <li>▪ Conduct rapid assessment on issues affecting payment and flag them.</li> <li>▪ Facilitated meetings with portfolio managers, residents, and ward councillors as part of a tenant education programme</li> </ul>	<ul style="list-style-type: none"> <li>▪ Increased participation of all tenants in paying their rent</li> <li>▪ Crosscutting issues successfully mainstreamed in all projects.</li> <li>▪ Increased knowledge about Social Housing among beneficiaries.</li> <li>▪ .</li> </ul>

Focus areas	Goals	Strategies	Outcomes
		<ul style="list-style-type: none"> <li>▪</li> </ul>	<ul style="list-style-type: none"> <li>▪ Increased number of collections growing at least in 2 different projects.</li> </ul>
	5.2 To mitigate the impact of non-payment on new projects	<ul style="list-style-type: none"> <li>▪ Re-visit vetting process criteria and work towards the ownership of the process</li> <li>▪ Target specific projects.</li> <li>▪ Do end date audit on the system to make early alerts.</li> <li>▪ Promote close collaboration with other MOE's</li> </ul>	Increased revenue collection.
6. Mitigations of the operational risks	6.1 To implement the action plans as per risk register.	<ul style="list-style-type: none"> <li>▪ To review the register monthly</li> <li>▪ To ensure compliance with MFMA and SCM regulations</li> </ul>	<ul style="list-style-type: none"> <li>▪ Good governance and improvement in audit outcomes.</li> </ul>
	6.2 To promote Risk Reduction (RR)	<ul style="list-style-type: none"> <li>▪ Mainstream RR principles in all programs</li> </ul>	<ul style="list-style-type: none"> <li>▪ Increased knowledge and practices among staff and communities</li> </ul>

Focus areas	Goals	Strategies	Outcomes
	strategies in all programs	<ul style="list-style-type: none"> <li>Promote RR strategies</li> </ul>	on non-payment risk reduction.
7. Prepare and effectively respond to material control deficiencies	7.1 To ensure access to up to date information on previous audit findings.	Strengthen linkages to department	Increased awareness of approaching audits
	7.2 To ensure availability of contingency plans and resources for effective response to audit issues.	Assign a task force to investigate options and draft a plan on how to ensure the availability of contingent plans.	Increased capacity to respond to mitigation issues as and when raised by auditors or AG

**The framework is guided by the following key principles:**

<b>Accountability and transparency</b>	The finance department will conduct itself with transparency, mutual accountability, openness and honesty, recognising these values as fundamental preconditions for the growth of our relationships with all stakeholders.
<b>Efficiency and effectiveness</b>	The finance department will implement all activities and programs in an efficient and effective manner.
<b>Commitment</b>	The finance department will be fully committed in serving the target communities and departments.
<b>Time consciousness</b>	A monitoring and evaluation system will be put in place to ensure that all programs and activities will be paid out in a timely manner.
<b>The Principle of the Common Good</b>	The common good entails that the sum of social conditions which allow people, either as groups or as individuals, to reach fulfilment more fully and easily, be made readily available and accessible.
<b>Prudent financial management</b>	The finance department will exercise prudent financial management practices in all programs and activities.

<b>Coordination and collaboration with other departments</b>	The finance department will work with other departments whenever possible to bring in expertise for effective implementation of projects and mainstreaming of crosscutting issues.
--	--

## 5.2.1

## Financial Impact

### Financial Sustainability

JOSHCO is fast growing which is evident from the increasing number of take on units from housing development to housing management and the phase-in human resources strategy to insource JOSHCO's key competencies of delivering service i.e.; security, cleaners, gardeners and general maintenance labourers. Financial sustainability is key to achieve the strategic imperatives of the organisation and the Shareholder. JOSHCO is however in a space that is directly impacted by the harsh economic conditions of the country. Rental collections are steadily lagging and the gap between expenses and income is widening. JOSHCO has embarked on the following strategies to reduce the loss and maintain its financial sustainability.

- Revenue drives which involve all departments at JOSHCO in particular revenue and housing management.
- Managing expenditures closely – cost containment measures
- Handover of tenants to the Local Magistrates Courts for Emolument Attachment or Garnishee Orders
- Refer the defaulting tenants to the Housing Tribunal Court for mediation (this is a free service)
- CoJ employee area account balances collected through Garnishee Orders
- Regularise illegal tenancing
- Relocate unqualifying tenants to TEA projects
- Educate tenants about Social Housing through the stakeholder engagement program and;
- Installation of biometric system throughout all projects.
- Alternative revenue sources through student accommodation and outdoor advertisement
- Generate revenue work executed on behalf of other City departments and entities

## Balance Sheet Optimisation

All projects that are managed by JOSHCO are capitalised in the City's balance sheet. JOSHCO would be engaging the City in order to persuade them to transfer the JOSHCO managed property portfolio to the entity. This would enable JOSHCO to improve its current and solvency ratios.

## Budget for 2020/21 Financial Year

**Table 9: The table below reflects the revised budget for 2019/20 financial year and the proposed budget for the medium term for 2020/21 - 2022/23:**

Description	Current Budget	Medium Term Revenue and Expenditure Budget: 2020/21 - 2022/23								
	Adjusted Budget	Tabled Budget	Adjust - ment	Adjuste d Budget	Tabled Budget	Adjust - ment	Adjuste d Budget	Tabled Budget	Adjust - ment	Adjuste d Budget

Table 10: Operational Capital Budget for 2020/21 Financial Year

Expenditure	Budget 2020/21	Budget 2021/22	Budget 2022/23
Computers	350,000	400,000	450,000
Furniture	500,000	200,000	250,000

## Revenue

JOSHCO's main revenue items are as follows:

- Rental of facilities and equipment;
- Agency services; and
- Grants and subsidies.

The take-on delivery of unit's programme by housing development to housing management will result in the delivery of 1550 units. Rental income will thus increase by 15% to R168,867 million.

The operational subsidy from the Shareholder has also increased by 18,4% to R24,355 million. JOSHCO earns 3% management fee for agency services in respect of the development of projects and this is derived from the development programme. Revenue would be maximised through selling of advertising space on certain JOSHCO projects especially in the inner city and through letting of commercial space of the ground floor of all new Inner-City projects.

Despite the current economic conditions, revenue collection remains a strategic imperative for the organisation and as such debt impairment has been maintained conservatively for the medium term with a slight increase due to continuing declining collection levels. Revenue collection strategies inclusive of encouraging tenants to switch over to the debit order system and paying the accounts through Easy pay at most retail outlets have been put in place.

## **Expenditure**

The financial planning for the year ahead, takes into consideration the following:

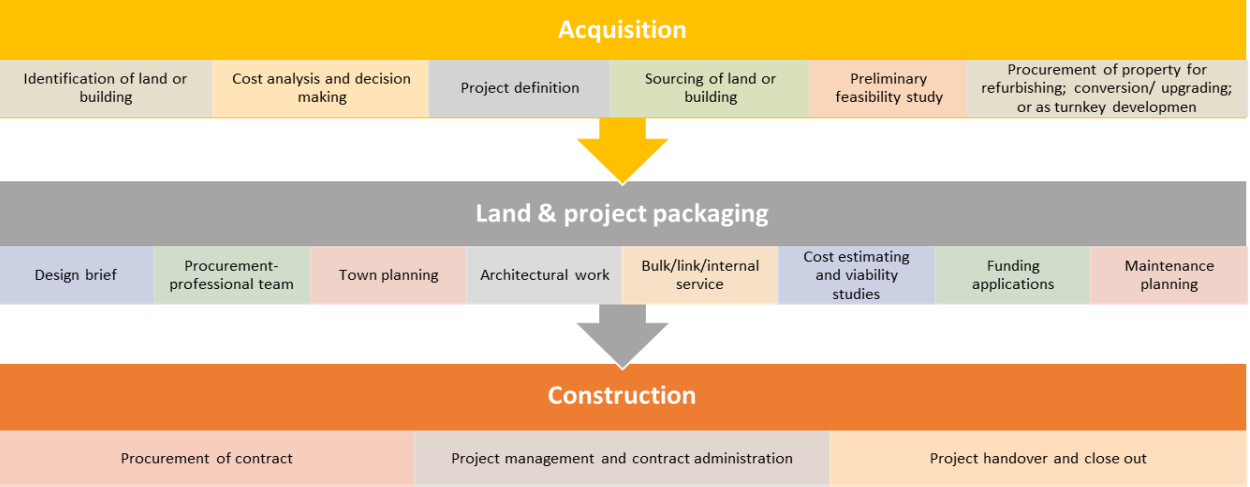

- Insourcing of security, cleaners and gardeners
- **Employee related costs:** Increase by 14.1% to R70,434 million  
Employee related cost is an enabler. The budget increase has been prepared on the following basis of filling of key positions in the new organisational structure. The increase in insourcing of key competency staff cost is higher than the reduction of repairs maintenance cost, as the amount includes benefits like pensions, etc.
- **Repairs and maintenance:** Reduction due to insourcing of cleaners and gardeners whose costs are now included under internal charges.
- **General expenses:** General expenses are also an enabler. Although JOSHCO strives to undertake its business through economies of scale, for the current financial year (2020/21) it has increased.

### **5.3**

### **Capital Expenditure**

The organisation has identified the need to improve its planning, delivery and organisation capabilities to become a leading and best practice developer of good quality, innovative and cost-

effective properties that contributes towards the creation of sustainable human settlements. Moreover, to enhanced quality of life of JOSHCO's target market. The achievement of the abovementioned key performance areas can be realised through strong adherence to the housing departments value chain as depicted in the figure below: -

**Picture 2**

**Mix Housing Options and Capital Management**

The table below reflects a detailed project plan i.e. number of Social Housing Units to be developed and number of Inner-City projects to be upgraded for the 3 three financial years, and the budget for each project. See Annexure B for details.

**Financial Year: 2020/21**

## Capacity Analyses

Capacity analysis was undertaken based on previous financial year organisational performance and in consideration of the performance audit findings as raised mostly by internal audit. The analysis pointed out the need to capacitate the organisation with further requisite skilled and competent staff in order to achieve better control environment and performance results. The table below depicts the requisite capacity to manage the performance risk.

## 7. COMMUNICATION AND STAKEHOLDER MANAGEMENT

JOSHCO's Integrated Communication, Marketing and Stakeholder Management Strategy is an implementation guide, reflecting JOSHCO's programmes aimed at ensuring that all JOSHCO stakeholders are informed and involved in driving the company's strategic agenda as set out in the Business Plan and the City's IDP. It is thus important for the functionality of the organisation to:

- ☉ Identify key stakeholders;
- ☉ Define communication parameters and needs;
- ☉ Design key messages,
- ☉ Choosing communication channels and
- ☉ Compile implementation methods

JOSHCO stakeholders are specific people, groups or organisations that could impact or be impacted by JOSHCO operations, projects and programmes. It is therefore key to have a systematic approach on how the organisation will engage and involve its stakeholders in strategic processes. Quite critical also is the platforms that JOSHCO will use to communicate or interact with stakeholders in order to accentuate the significance of collaborating to build dependency.

### **Rational**

This Integrated Communication, Marketing and Stakeholder Management Strategy is based on the current environmental factors influencing our communication with stakeholders and the

sectoral environment we operate in, and so JOSHCO needs to prioritize all the areas of improvement and build on them. Stakeholders are a commonality in the organisation’s communication - demanding every department within JOSHCO to play a role in driving this strategy thrive. The above statement necessitates the move of communications from a back-office support function to a more strategic role, being the face of change in the way JOSHCO operates - this will contribute towards fostering good relations between departments and promote exchange of strategic business information. The organisation’s priority is to position JOSHCO as a brand that is reliable and consistent in its service offering. This requires consideration of the organisational communication objectives, priorities and tactics to achieve positive outcomes.

**Organisational Communication Objectives**

Picture 3

**7.1 Stakeholder Matrix**

The JOSHCO Stakeholder Management is a process to identify people, groups or organisations that could impact or be impacted by JOSHCO operations and projects, analysing of stakeholder expectations and interest on JOSHCO operations and projects, as well as developing appropriate

strategies to effectively engage with the stakeholders. JOSHCO Stakeholder Engagement is a process of communicating and working with stakeholders to meet their needs/ expectations, address issues as they occur and engage throughout JOSHCO's operations and projects' life cycles.

### **Stakeholder Mapping and Analysis**

JOSHCO's stakeholders are internal and external with varying degrees of influence, including but not limited to, funders, customers, public, regulators, politicians, board of directors, management and staff, all yielding unique communication needs, approach and requires distinct resources. Essential to this strategy is engaging, recognizing and acknowledging the importance of the organisation's key stakeholders. More detailed stakeholder maps will assess each stakeholder in terms of their interest and impact in the work and influence over the way it is performed. Those with an ability to directly affect the objectives are sometimes highlighted as being the key stakeholders with high impact.

**Table 15: Stakeholder Management and Related Level of Importance**

	<b>Name of Stakeholder</b>	<b>Specific Interest in our Business</b>	<b>Interest</b>	<b>Power</b>	<b>Impact</b>

### 2020/21 Communication and Priorities

This strategy addresses communication needs and priorities holistically; and identifies ways of improving the problem areas.

- ⦿ To maximize the impact of our projects by making the results and deliverables visible to stakeholders and the wider audience.
- ⦿ Heighten City's Strategic Priorities and Programmes
- ⦿ Prompt pro-active communication on service delivery and response
- ⦿ Business optimization and social presence by communicating JOSHCO's successes, policies and processes on multiple platforms
- ⦿ Change negative perceptions held by the public by addressing challenges openly and demonstrate the impact of JOSHCO in the lives of Johannesburg residents
- ⦿ Boost continuous interaction with stakeholders to improve service delivery,
- ⦿ Automation of processes (applications, billing, payments, invoicing etc.)
- ⦿ Personalisation of customer experience by using online solutions (i.e. live chats)
- ⦿ Use Info-graphics, animation and videography to boost best interpretation of our key messages
- ⦿ Manoeuvring of unrealistic expectations from communities to avoid boycotts
- ⦿ Device new tactics to boost our Corporate Social Investment (CSI) support.

## Picture 4

### Planning and Coordination

JOSHCO to involve stakeholders from the inception of JOSHCO development projects to create the basis for a shared vision that could boost our relationship with stakeholders. The aim is to fairly identify and respond to all legitimate interests by providing clear and convenient opportunities for substantive involvement at critical stages in the development process. Involvement should begin well before a development plan is on the table, the scope of participants' decision-making power should be clear at the outset, and all involved should be periodically updated on how their input is being used. The impact and result of this kind of involvement can be a growth plan that will uphold the rights of access and protect the community's interest and needs.

### Collaboration

JOSHCO to prioritize stakeholder collaboration to ensure that their interest in the rights of access to JOSHCO projects and programmes is upheld. Collaboration with the office of the MMC, Housing department and local Media is critical for the organisation's brand management and by employing robust media interactions – the organisation will enable a swift implementation of JOSHCO projects and programmes. Our brand statement depends (to some extent) on these key collaborations.

### Innovation

JOSHCO to exploit new innovative ways that boost and build close, harmonious relationships with communities

- ☉ Forming Strategic Partnerships and devising interactive programmes - **Service Desk** - these are aimed at elevating service delivery to meet new prescribed standards and improve turn-around times whilst promoting the entity as a prime brand.
- ☉ Stimulating community empowerment programmes to leverage on JOSHCO's relationship with tenants in order to achieve accelerated delivery of units and uninterrupted allocation processes - **Corporate Social Investment** – giving back to the community.
- ☉ Developing collateral to package specific messages to address specific audiences on specific issues – **Infographics** - communicating using image to simplify the message.

The 2019/20 Activation Plan address pro-active engagements and coordination of activities between JOSHCO and the City. This is aimed at addressing development and tenanting plans, community empowerment opportunities, respond to queries and to promote the company's successes - **Media Briefings**

### **Brand Promotion and Reputation Management**

The objective of promoting JOSHCO as a Brand is to establish a distinct identity for our service offering in an attempt to persuade consumer buy-in by promising to serve their needs in a unique way. *“Brand promotion is key to inform, remind, persuade convincingly, and influence the consumers to drive their decision towards service under a particular brand”*. JOSHCO will employ this tactic to stabilize stakeholder relations, expand and reposition itself as a respectable brand within the housing sector and Johannesburg, predominantly.

### **Brand Promotion Methods we will consider keeping the JOSHCO brand noticeable –**

- ⦿ Establish efficient, interactive online/ digital engagement platforms
- ⦿ Engage in robust media engagements to create an understanding of our Strategic Priorities and Programmes
- ⦿ Improve Social Media presence
- ⦿ Introduce (CSIs)/ Charity initiatives to boost trust and confidence in JOSHCO and its leadership
- ⦿ Distribution of branded items/ gifts to boost our brand visibility and relevance
- ⦿ Optimizing our brand visibility through project branding & advertising
- ⦿ Implement programmes/events that will boost community relations and change negative public perception and restore the organisation's reputation.

### **Corporate Identity Standards**

JOSHCO's Corporate Identity (CI) is derived from the City of Johannesburg's Corporate Brand Standards - this includes branding guidelines and corporate templates. JOSHCO has an existing CI manual that will be reviewed and updated when the City finalises the process to design a new Logo and position statement. The look and feel of JOSHCO collateral, digital communication platforms, branding material, adverts and project signage is affected. JOSHCO's Communication Policy addresses standards and procedures concerning branding; communication protocols and

internal/external coordination of events, while the Corporate Identity Manual (commonly known as A CI MANUAL) addresses in detail: the use of the JOSHCO logo.

## 9. INFORMATION AND COMMUNICATION TECHNOLOGY DEPARTMENT

Principle 12 of the King IV report on Corporate Governance requires that, the Board assume responsibility for the Governance of technology and information by setting the direction for how technology and information should be approached and addressed in the organisation. The Board has delegated such responsibility to the Board Risk and Audit Committee which meets once per quarter and ICT matters are presented to the said Committee as and when necessary. JOSCHO has developed a 3-year ICT strategic and ICT action plan and will be rolled out in the next 3 financial years. JOSHCO ICT is responsible for the following objective which relates to the improvement of the ICT infrastructure and governance:

- Improve ICT infrastructure and governance.

In order to achieve this objective, an ICT annual action plan is in place that includes the major projects that the ICT department is required to implement at JOSHCO.

The required projects are as follows:

- Implement Electronic Document Management System;
- Implement Dashboard Solution to track the real-time performance;
- Provision of adequate ICT services at JOSHCO projects;
- Developing JOSHCO Website;
- Implementation of effective COBIT Governance Framework;
- Implementation of ISO 27001 Information Security Framework;
- Hosted Data Storage Solutions;
- JOSHCO IT infrastructure and Technology assessment for the CoJ SAP implementation project
- IT Asset and Service Management, System provides enterprise wide inventory and life cycle management of software and hardware assets. This can include asset maintenance history, user permissions, acquisition budget forecasting, and software license compliance;
- Implement Effective Disaster Recovery Site and Solution

## 10. AUDIT RESOLUTION (OUTSTANDING ISSUES)

Several audit findings have been raised by internal and external auditors in the previous financial year. The organisation has been implementing corrective measures to address the possible risks related to the raised findings. In the beginning of the 3<sup>rd</sup> quarter of the previous financial year 2019/2020 the contract of the outsourced Internal Auditor (OMA Chartered Accounts) expired and measures were put in place to appoint an audit manager on a permanent basis to establish an internal audit division to ensure continued process of managing the audit findings and ensure that, implementation of corrective actions is adequately implemented as required by standard 2500.A1 of the Internal Audit Profession Act.

JOSHCO has since established the internal audit unit. The Manager was appointed and commenced work on the 1<sup>st</sup> May 2020.
